Driven to create cables that produce custom voiced sound and feature unique connectors and style, Bullet Cable launched in 2003. Notably, it was the thick retro-style coil cable with .44 Mag connectors that caught the attention of artists. With custom-engineered coax cables that achieve a broad range of highs and lows the curly cords began appearing in music videos, on recordings, and as an accessory to high powered players in clubs and in shows. Top bands searching for professional quality sound and dependability for the studio and stage have been increasing the roster as Bullet Cable customers.

Bullet Cable has expanded the connector and cable market with a range of possibilities. Built with advance technology and designed like none other, the Bullet Cable products that follow are the highest-level performance accessories of their kind.

Bullet Cable

EXPERT SOUND DISGUISED AS COOL STUFF

Clean up your tone and your rig with Bullet Cable DIY Cables. Featuring advanced audio technology including dual-shielded construction and 99.99% oxygen-free copper conductors that reduce noise from surrounding electronic devices and project strikingly fuller tone, and flexible symbol-printed jackets designed for maximum durability, Bullet Cable DIY Cables offer a professional-grade solution to your personal performance needs at home, in the studio, or on stage.

Custom-voiced for basses and guitars.
For exclusive use with precision-engineered
Bullet Cable DIY Connectors.

Bullet Bulk Cable is available in 10 ft packages.
Also available are easy pull boxes containing
100 ft and 200 ft (solid black) for custom lengths.

DIY CONNECTORS

For maximum signal integrity and consistently excellent sound, use Bullet Cable DIY Connectors and Bulk Cable.

Specially developed for discerning musicians and audiophiles, Bullet Cable pedal and effects connectors are designed for hassle-free ease of use with reliable signal delivery everytime.

SILVER BULLET CABLE

Get the most bang for your buck with the Bullet Cable Silver Bullet. It delivers edgy, full-range, high-definition rock sound, while the durable mesh jacket and polyethylene-potted chrome .44 Mag bullet connectors with corrosion-resistant 24K gold-plated tips keep Silver Bullets tough and true to their name.

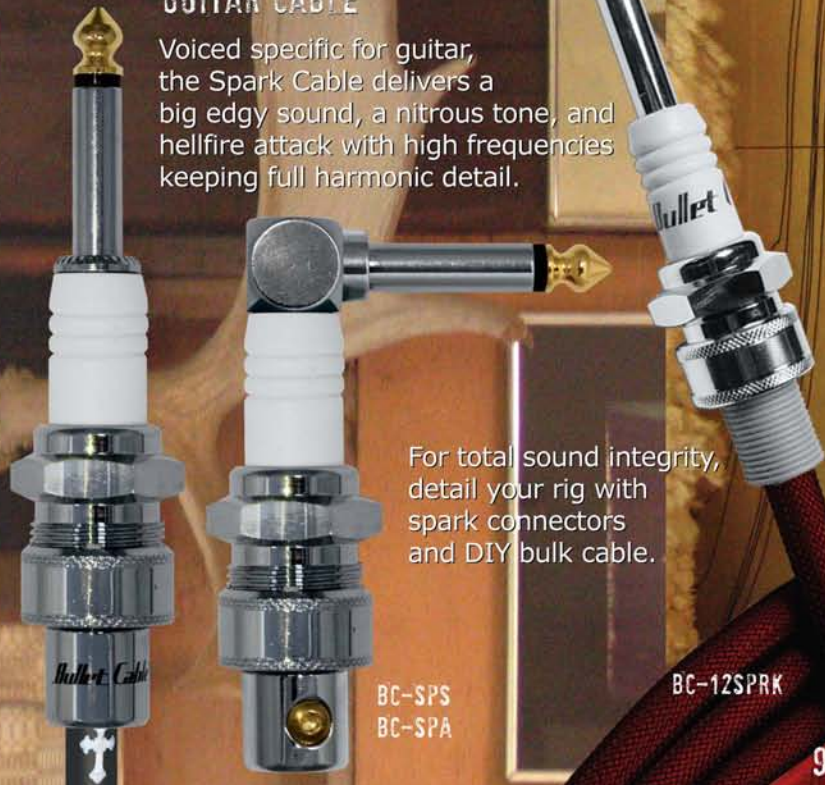

Available in lengths of 12 ft (3.66 m) and 20 ft (6.1 m), Silver Bullets are custom-voiced for basses and guitars.

COIL CABLES

A modern improvement on the classic "telephone cord cables" loved by rock legends, Bullet Cable Coil Cables feature oversized kink-free coils and polyethylene-potted .44 mm bullet connectors that won't pull loose during active sessions. With advanced audio technology that includes 99.99% oxygen-free copper conductors and spiral shielding in a coaxial design for clear tone, and corrosion-resistant 24K gold-plated connector tips to preserve signal strength, Coil Cables display excellent bass weight, hit hard in the mids, and caress high notes.

Custom-voiced for basses and guitars.

Expands to 30 ft (9.1440 m)
